

A passion for quality

We add a splash of colour

## Haptics and colour for delicate contents

FROSTED

Frosted surfaces and rich colours offer new possibilities of designing primary packaging made of tubular glass.

*Owing to tubular glass which is composed of the purest materials we are now in a position to produce primary packaging of uniform wall thickness and very low weight.*

Pastel colour gradients with a discreet look

A subtle play of colours to visualize the contents or the field of application represents a new type of premium packaging.

*Modern production facilities for the manufacture of ampoules and bottles allow Lutz to meet the highest demands on primary packaging made of tubular glass.*

GRADIENT

Rich colours of persuasive power

COLOURED

The vibrant colours of our bottles draw the attention to the exclusive contents.

*Our standard production line comprises bottle volumes from 5 ml up to 50 ml. We also supply special sizes on request.*

The new treasure of your portfolio

Bottles made of tubular glass and coated with silver or gold colour represent high quality packaging with an air of exclusivity.

*A 100% control and documentation during production processes are indispensable for us; therefore we can offer our clients a secure and guaranteed workflow.*

GOLD + SILVER

Special contents allow no compromise

BLACK + WHITE

Contents sensitive to light are perfectly protected by bottles with black or white finish.

*The more specific the customer requirements, the more obvious Lutz becomes the supplier of choice for quality ampoules and bottle production.*

*Due to our experience of many years, we are best placed to find solutions for all kinds of different requirements on primary packaging made of tubular glass.*

The peak of perfection

Whether partially printed or decorated with rhinestones, there are many possibilities of refinement. High quality closures, pipettes, ampoule breakers or displays complete our product offering.

*Depending on the application, many different materials may be used. In addition to producing bottles and ampoules, we will work closely with clients to develop solutions for perfect packaging.*
